

Locking Wall Mount Dial Diluter with The One

SINGLE MSDS COLOR CODING SYSTEM

Commercial Quaternary Degreasing Cleaner Concentrate System

Commercial Quaternary Degreasing Cleaner Concentrate System

USE DILUTION APPLICATION CHART

METERING DIAL ADJUSTMENT

1. The concentration of these mixed solutions is determined by the dial setting, the accuracy of the chemical concentrate, the water pressure, and whether the proportioner is set to low or high flow.
2. The chart below shows the options for the low flow and the high flow settings on the proportioner. The chart is based upon 40% of concentrate per gallon of water with the proportioner valve fully opened, and a water flow (chemical concentrate 1:2.5). Change the dial setting and water flow to meet your requirements. Make sure to use proper chart for either Handcar Flow or High Flow option.
3. When the metering dial is set, the chemical concentrate inside the diluter is diluted the solution flows through each valve by measuring the amount of water drawn into the diluter. The size of the water being drawn in will vary according to the concentration of the concentrate drawn.
4. To select application, indicate on the metering dial on the unit that has been prepared, set dial on the proportioner to the application direction the "HIGHER" or "LOWER" flow setting, insert the appropriate nozzle, bucket, or machine. Push actuator below "HIGHER" or "LOWER" to and vent to fill bottle, bucket, or machine to the required level. Release or remove nozzle.

HIGH FLOW PROPORTIONER			DIAL SETTING	LOW FLOW PROPORTIONER			DIAL SETTING
Bulk Window Cleaning	Auto Scrubber Floor Cleaning	Manual Floor Cleaning	1	Windows & Glass and Plexiglass	Chairs, Benches & Whiteboards	Tabletops & Desks	1
Light Duty Scrubbing	Sanitize Restaurant Kitchen Cleaning	Carpet Upholstery Extraction	2	Multi-Purpose Kitchen	Multi-Purpose Bathroom	Carpet & Upholstery Spotter	2
Office Wall Partition Cleaning	Carpet Shampooer Cleaning	Pressure Washer	3	Floor Waxing	Carpet & Upholstery Extraction	Luxury Table Stains	3
Exterior Window Degreaser Engine Degreaser Process Washer	Heavy-Duty Soap Scrub	Heavy-Duty Scrubbing Stripping	4	Pool & Spa Stain	Carpet Stain & Laundry Spotter	Grease & Grease Stain Remover	4

W.O.W! Brands Products Cross-Market Cleaning Systems represent a breakthrough in cleaning technology, offering users a single MSDS program designed to keep inventory, training, storage and costs to a minimum. This reduces your chemical expenditures by 20%-30%, while maximizing profit.

Environmentally Responsible Products That Work

In addition to reducing expenses, increasing efficiency and productivity, you can reduce your carbon footprint with W.O.W! Brand Products because they are reuseable, recyclable, refillable, sustainable, and biodegradable!

Our Cross-Market items are also available in single MSDS RTU (Ready-To-Use) formats that are color-coded, easy to use, and can be refilled, recycled, and reused!
